To whom it may concern,

Hello, you had filled the application for the official email registration and we had set up your account appropriately. This email is sent to [contact@vhackusm.com](mailto:contact@vhackusm.com) and it should be forwarded to you, [varsityhackathon.contact@gmail.com](mailto:varsityhackathon.contact@gmail.com). Do confirm that the "TO" field above is labelled the custom email.

Once you have confirmed that, you can set up your account to send email from it! **Follow CLOSELY** the video guide here: <https://bit.ly/vhackusm-email-guide>\*\*

**Password: y3Dax9ILEVS0rMR2**

**IMPORTANT: Please keep the password secure.**

**\*\*Addendum:** After you have added the email address, **click "make default"** beside the newly added vhackusm email and **click "Always reply from default address"** below. Image guide: <https://bit.ly/vhackusm-email-default>

After you had finished the setup as instructed, you **MUST** send out a test email to your student account or personal Gmail to check whether you had the full ability to send email to others. In the event that you are not able to set up the account or cannot receive emails from the custom email (and you have checked the **spam folder**), do reply to this email or message me via WhatsApp to help resolve the issue.

Thank you.

Best regards,

**Ng Young Shung**

Coordinator of Technical Department,

Varsity Hackathon 2023,

Computer Science Society,

Universiti Sains Malaysia
